建築壁材別施工方法
(詳細は、施工説明書、カタログ、設計施工資料集を参照してください) (単位: mm)

▲ 警告 / WARNING / . . / . .

※注意ラベル詳細(1:2)

手すりを取り付ける際は、施工方法にあった当社指定の固定金具を必ず使用してください
材質：ステンレスの表面に軟質塩化ビニール樹脂を被覆

軽量鉄骨下地		
ボルト固定	メカナット固定	取付プレート溶接固定
Diagram illustrating Bolt Fixing (ボルト固定). The method involves using a bolt (化粧ナット) to secure the plate to the wall. The wall is labeled 壁仕上げ面 (Wall Finishing Surface). The distance from the wall to the bolt is 15±3. The bolt is secured with a nut (化粧ナット). The plate is labeled 合板など (Panel, etc.). The support plate is labeled 手すり支持板 (Handrail Support Plate). The bolt is labeled 長ねじボルト 通し穴 (Φ11) (Long screw bolt through hole (Φ11)). The plate is labeled M10タップ加工 下穴 (Φ8.5) (M10 tap processing bottom hole (Φ8.5)). The distance from the wall to the bolt is 15±3. The bolt is secured with a nut (化粧ナット). The plate is labeled 合板など (Panel, etc.). The support plate is labeled 手すり支持板 (Handrail Support Plate). The bolt is labeled 長ねじボルト 通し穴 (Φ11) (Long screw bolt through hole (Φ11)). The plate is labeled M10タップ加工 下穴 (Φ8.5) (M10 tap processing bottom hole (Φ8.5)).	Diagram illustrating Nut Fixing (メカナット固定). The method involves using a nut (メカナット) to secure the plate to the wall. The wall is labeled 壁仕上げ面 (Wall Finishing Surface). The distance from the wall to the nut is 15±3. The nut is secured with a bolt (化粧ナット). The plate is labeled 合板など (Panel, etc.). The support plate is labeled 手すり支持板 (Handrail Support Plate). The nut is labeled 長ねじボルト 通し穴 (Φ16) (Long screw bolt through hole (Φ16)). The distance from the wall to the nut is 15±3. The nut is secured with a bolt (化粧ナット). The plate is labeled 合板など (Panel, etc.). The support plate is labeled 手すり支持板 (Handrail Support Plate). The nut is labeled 長ねじボルト 通し穴 (Φ16) (Long screw bolt through hole (Φ16)).	Diagram illustrating Plate Welding Fixing (取付プレート溶接固定). The method involves welding the plate to the wall. The wall is labeled 壁仕上げ面 (Wall Finishing Surface). The distance from the wall to the plate is 15±3. The plate is labeled 合板など (Panel, etc.). The support plate is labeled 手すり支持板 (Handrail Support Plate). The plate is labeled 長ねじボルト 通し穴 (Φ11) (Long screw bolt through hole (Φ11)). The distance from the wall to the plate is 15±3. The plate is labeled 合板など (Panel, etc.). The support plate is labeled 手すり支持板 (Handrail Support Plate). The plate is labeled 長ねじボルト 通し穴 (Φ11) (Long screw bolt through hole (Φ11)). The distance from the wall to the plate is 15±3. The plate is labeled 合板など (Panel, etc.). The support plate is labeled 手すり支持板 (Handrail Support Plate). The plate is labeled 長ねじボルト 通し穴 (Φ11) (Long screw bolt through hole (Φ11)).

*ばね座金・化粧ナットは手すり本体の付属品です。
